```
=================
Package Management
=================
List packages: pkginfo
Package Install: pkgadd -d </path-to-package>
Package Remove: pkgrm <pkg_name>

Scripted Package Removal
-------------------------------
Create a file: noise with this content:
mail=
instance=overwrite
parital=nocheck
runlevel-quit
idepend=nocheck
rdepend=nocheck
space=quit
setuid=nocheck
conflict=nocheck
action=nocheck
basedir=default

Use this sequence in your script: pkgrm -n -a noask <pkg_name>
```
